this kinde, Winter Quarter is the first
Quarter, which took beginning the 12. day of
December 1635. at what time the Sunne en-
tered into the first degree of the cold & dry signe
Capricorne, being the most remote from us
in his farthest South declination, causing the
dayes with us to bee shortest and the nights
longest: which Quarter continuing untill the
Sunne hath slowly passed through Capricorne,
Aquarius and Pisces. This Quarter doth na-
turally resemble old age.

Of the Spring.

☉ in ♈, ♉, ♊.

THIS Quarter doth take beginning the 10.
of March, at what time the Sun entresth
into the first min. of Aries, and doth continue
whilst the Sunne is passing through these 3.
bernall signes, Aries Taurus, and Gemini. This
Quarter doth resemble growing youth.

Of Summer.

☉ in ♋, ♌, ♍.

The Summer Quarter doth take his beginning when the Sunne doth enter into the first degree of Cancer, which will bee this yere the 12. of Iune, and doth continue whilst the Sunne passeth thro:ow Cancer, Leo, Virgo, now are the dayes longest, and the ayre hottest, therefore, but for necessity, bid Physicke Adieu.

Of Autumne.

☉ in ♎, ♏, ♐.

Autumne or Harbest Quarter (commonly called the Fall of the leafe, of some the Latter Spring) doth begin when the Sunne doth enter into the first degree of Libra, making againe the day and the night of equall length: which will be this yere the 13 of September, and doth continue whilst the Sunne doth passe through Libra, Scorpio, and Sagitarius. This Quarter doth fitly resemble declining age and Phlegmaticke complexion.
